SUMMARY

Full Stack AI Engineer with 10+ years shipping web products end to end - typed React/Next.js front ends, Node.js and Go services behind them, and production AI features on top. Independent freelancer since 2021, working directly with founders and product teams in Australia, Europe, and North America as the one person who holds the whole picture: architecture, UI, APIs, and delivery. Recent focus: tool-calling agents, streaming chat, and MCP servers built on the Claude and OpenAI APIs - with evaluations and spend limits in place before launch.

EXPERIENCE

Independent Freelancer

Upwork

November 2021 - Present, remote

- Ship production front ends and APIs for clients including Fiskil, MokoBoko, Lantern, Shosho, and Crowe MacKay LLP - five products live with real users.
- Own features end to end: typed React/Next.js interfaces, the Node.js and Go services behind them, and the shared component libraries that keep them consistent.
- Build the AI layer alongside the product - tool-calling agents and streaming chat for Lantern; an AI docs assistant and MCP server for Fiskil on the Claude and OpenAI APIs.
- Turn Figma files into pixel-perfect, accessible interfaces — and design and ship the UI myself when there is no designer.

Team Lead

GreenApex Technolabs (Xpro.ai)

July 2017 - October 2021

- Led delivery teams across enterprise client projects; designed front-end and back-end architecture from scratch.
- Ran sprint planning, estimation, and task distribution; took internal product ideas from requirements gathering through to launch.

Full-Stack Developer

Dotnpixel

December 2015 - May 2017

- First full-stack role: built and maintained client web apps - React on the front end, Laravel behind it - owning planning, development, and deployment.
-

PROJECT

Fiskil

fiskil.com

- Open-banking data infrastructure for banks and energy providers.
- Built the customer console and auth flows, Go services on Google Cloud, and a docs platform with an AI assistant and MCP server.

MokoBoko

mokoboko.xyz

- Class booking platform for a boutique fitness studio in Lisbon booking app, admin console, shared component library, and an Express API with Stripe payments and automated emails.

Lantern

withlantern.com

- AI marketing platform - React Flow workflow builder, Express/Fastify APIs, and Temporal jobs powering agents that research, personalize, and launch campaigns.

Wingie

wingie.com

- Flight comparison/booking marketplace, and a verified rental-listings platform in Poland React/Next.js, Redux, React Query, PostgreSQL, Storybook.

EDUCATION

B.E. in Computer Engineering

Gandhinagar Institute of Technology, Gujarat, India • 2014

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Radix UI, Redux, React Query, React Flow

Backend: Node.js, Express, NestJS, Fastify, Go, REST APIs, Temporal, Stripe integrations

AI & Agents: Claude API, OpenAI API, Vercel AI SDK, MCP (Model Context Protocol), tool-calling agents, RAG / vector search, Claude Code, Cursor

Data & Cloud: PostgreSQL, MongoDB, Supabase, Firebase, Sequelize, Google Cloud, Docker

Quality & Design: Playwright, Cypress, Jest, Storybook, Figma-to-code, accessibility (WCAG), Git
